## Sakura Finetek USA Press Release

February 19<sup>th</sup>, 2018

### **Sakura Finetek launches the *Tissue-Tek Prisma® Plus* Automated Slide Stainer, now faster to increase histology laboratory productivity.**

Contact: Erico von Bueren, Director of Marketing

TORRANCE, CA – Sakura Finetek USA, Inc. today announced the launch of the *Tissue-Tek Prisma® Plus* Automated Slide Stainer, making the already fastest histology slide stainer in the industry faster to 530 slides per hour.

“Like its predecessor, the *Tissue-Tek Prisma®* Automated Slide Stainer, with several thousand units installed worldwide, *Tissue-Tek Prisma® Plus* continues to be the slide stainer of choice for large commercial laboratories and hospitals”, said George R. Kennedy, Senior Vice President of Sales and Marketing at Sakura Finetek USA. “We are proud of the performance data for the *Prisma* stainer family which confirms best-in-class reliability with industry leading Mean Time Between Repair of greater than 52 weeks. This product is simply unmatched in our industry”.

#### **New software features**

In addition to increasing the speed to 530 slides per hour to better address peak slide throughput demand, new key software features have been added to gain flexibility, versatility and maximize uptime. New software enhancements include the ability for the user to now choose between 50 stain reagent colors to better identify and differentiate them when displayed on the user interface. This is especially useful when running multiple protocols at the same time.

#### **Integrated barcode and documentation**

To track the soon-to-be released Sakura Finetek *Tissue-Tek Prisma® H&E Stain Kit #1*, the company has added a new barcode scanning system to the *Prisma Plus* to scan stain kits and components and automatically log this information into the system software. This new feature improves documentation and helps laboratories to more easily comply with CAP and

continuous innovation for pathology

other inspection agency requirements of logging stain lot numbers, when stains are put in/out of use, track expiry dates and receive alerts.

### New Tissue-Tek® iSupport™ for remote diagnostics

The Prisma Plus now offers Tissue-Tek iSupport, the latest software technology in remote diagnostics and monitoring. iSupport enhances the user experience by assisting in providing the quickest service response possible to your laboratory for maximum uptime and minimal downtime.

### Fully Automated Staining and Coverslipping System

By connecting the Prisma Plus with either the Tissue-Tek Film® Coverslipper or the Tissue-Tek® Glas™ g2 Coverslipper, laboratories can today create an integrated, fully automated walkaway staining process from slide baking to slide drying.

### About Sakura Finetek USA, Inc.

With the U.S. office based in Torrance, California, Sakura Finetek is the global leader in continuous innovation for pathology by providing integrated solutions for anatomic pathology and patients through best-in-class innovation, quality and customer care. With a strategic focus on end-to-end automation, Sakura Finetek continues to lead the industry in the development and commercialization of automated histology instrumentation and consumables for anatomic pathology. Sakura Finetek systems dramatically increase efficiency, standardize results, and enable customers to more simply manage their daily workload while significantly influencing patient care.
