Sakura Finetek USA Press Release

August 1, 2023

Sakura Finetek USA launches 2 new Tissue-Tek Genie® branded products to enable CISH testing on the Tissue-Tek Genie® Advanced Staining System.

Contact: Erico von Bueren, Senior Director of Marketing and Strategy

TORRANCE, CA – Sakura Finetek USA, Inc. today announced the launch of new ready-to-use reagents for CISH testing.

“Sakura Finetek USA’s commitment to increasing our menu for IHC as well as ISH is vital to our mission of improving the clinical value and utility of the Genie product line and advancing the quality of patient care. Enabling CISH testing on the Tissue-Tek Genie Advanced Staining System is critical to furthering the capabilities of our platform,” stated William Jennings, Senior Product Manager of Advanced Staining.

The 2 new products include:

- Tissue-Tek Genie® Proteinase K.
- Tissue-Tek Genie® CISI User-Fillable Cartridges for CISI Amplification Linker.

The Tissue-Tek Genie branded CISI products may be used on the Tissue-Tek Genie Advanced Staining System. Laboratories performing high complexity testing may develop and validate their own protocols using these products along with probes and other reagents of their choice.

About the Genie System

Quality that excites. Sakura Finetek partnered with NordiQC (www.nordiqc.org), a world-leading external quality assurance institute, to assure optimal stain quality for our entire menu of antibodies. The species and clones of Genie antibodies have been carefully selected and proficiently developed to meet our rigorous standards. The stain protocols for Genie antibodies provide exceptional sensitivity and specificity to enable accurate assessment of patients’ specimens by pathologists.

continuous innovation for pathology

Stop sorting, gain time. With its 30 fully independent staining stations, the Genie offers true random access and does not slow down when more slides are added. Users can eliminate time-consuming slide sorting or grouping, and instead simply load their next most important slide or case.

Flexibility that liberates. Laboratories can use Genie's unique and innovative single-use capsules for antibodies or probes and load them on Genie's independent staining stations together with the slides. The 250-test Genie PRO Detection Systems (DAB, AP Red, DUO) and antibody cartridges are loaded onto the system's carousel, which deliver the reagents in constant timed cycles guaranteeing predictable workflow. Genie allows users to realize flexibility, better economy, and faster turnaround time.

Fast to learn, easy to operate. The Genie Software uses intuitive graphics and two mouse-click navigation for simplified operation and provides a comprehensive status at a glance. The replacement of bulk reagents and waste bottles is quick and strain-free.

About Sakura Finetek, USA, Inc.

With its U.S. office based in Torrance, California, Sakura Finetek is the global leader in advancing cancer diagnostics by providing integrated solutions for anatomic pathology and patient treatment through best-in-class innovation, quality, and customer care. With a strategic focus on end-to-end automation, Sakura Finetek continues to lead the industry in the development and commercialization of automated histopathology instrumentation and consumables for anatomic pathology.

Sakura Finetek systems dramatically increase efficiency, standardize results, and enable clinical laboratories to manage their daily workload more simply while significantly impacting patient care. Visit www.sakuraus.com to learn more.
